

CASE STUDY

Data, Insights, and AI Engineering Managed data platforms

Client success story

Drug Company Saves Over US\$100,000 annually on Compliance Costs

Client need

Improve safety data transparency and quality from clinical trials

The client, a global consulting major, needed to help their end-client in the pharmaceutical industry optimize compliance costs with a data management solution.

How we helped

Developed a solution based on data management and analytics

Innominds approached this project as a development partner who would help the client shape the solution. Based on our expertise we combined data lifecycle management, unstructured data management and UI engineering to improve the quality, transparency, and interoperability of safety data from post marketing and clinical trials as well as real- world sources such as social media. We also provided marketing support to create collaterals.

What the client gained

Optimized costs of compliance reporting

- ⌚ The solution helped the client enable their end-client to save tens of thousands of dollars in compliance reporting costs
- ⌚ Obtain early feedback on drugs for improvement and help in prevention of spread of adverse events

About Innominds
