

Fast-Tracking Digital Transformation Initiatives in Fintech

Empowering companies to revolutionize their financial services with powerful data solutions and experienced engineering teams.

Innominds Accelerating the Change in Fintech

We help enterprises unlock the power of digital and help them achieve their Digital Transformation goals.

Our platform-led, AI-first service offerings are tailored and positioned to ride the wave of growth and opportunities that the future presents.

We have deep expertise in AI & ML, Analytics & BI, and Cognitive Technologies for enterprise Digital Transformation.

We enable enterprises to speed up their go-to-market and reduce the cost of development with our Rapid Application Development (RAD) offering.

Our Chip to Cloud and Cognition Service Offerings

Experience Engineering

We create surreal experiences for the modern era

Data and Analytics Engineering

We apply AI, ML, and analytics for the cognitive era

Software Product and Digital Engineering

We build cutting edge software products for the digital era

Application Modernization and Cloud Engineering

We modernize and SaaSify applications for the cloud era

Quality Engineering

We promise software quality for the modern era

Security Engineering

We develop secure applications for the connected era

DevOps and Continuous Engineering

We do continuous engineering for the agile era

Connected Devices and IoT

We engineer connected devices for the IoT era

Snapshot of Innominds Expertise in BFSI Vertical

Platform Engineering across multiple BFSI Segments

Product development and maintenance

Brokerage processing system for a financial solutions client.

B2B Integration

Robo-advisory platform integration with strategic portfolio system.

Global Index Solution

Integrated and scalable platform for index R&D and index operations enabling to build data, rules, workflow, and analytics capabilities.

Cognitive Spend Insights

Rapidly classify complex transaction data, achieve faster & deeper insights from unstructured transactional data.

Delivering Predictive, Prescriptive, Descriptive & Edge Analytics for Banks & Fintech companies

Prescriptive Analytics

Built new customer onboarding workflow using facial imaging and emotional analytics.

Edge Analytics

Safeguarding ATMs and raising alarms and alerts on detecting anomalies.

Predictive Analytics

Fraud detection and prevention, another avenue for BFSI companies to improve profitability.

Delivering Identity and API Management Solutions for Banks

B2B Service Integration

Assessment & Revision of the operating model for production roll-out.

SSO on Web and Mobile

Single Sign-on to securely interact and provide banking services to its large and growing consumer base.

Security Engineering

Securing the APIs from threats and vulnerabilities when exposing the APIs to the external world.

Mobile SSO and API Security

Enhanced API management platform with CA API platform for mobile access to secure APIs enabling higher mobile app adoption.

Application Modernization & Platform Integration for Fintech companies

Payment Application Development

Developed a secure and PCI compliant payment solution driving the client's business towards digital money.

Application Development

Modernization of legacy applications for the client to display and sell its Internet products and advertising services.

Payment Gateway Integration

Payment gateway integration for Big-4 Consulting Firm.

B2B Platform Integration & Credential Management

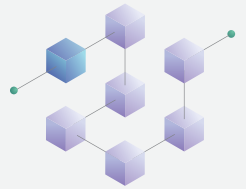

B2B platform integration and credential management enhancement with 2-factor authentication for one of the leading global fintech companies.

Learning & Development Insights for Insurance Sales Agents

Developed a learning and development tracking and evaluation platform for insurance sales agents.

Blockchain Technology for Fintech companies

Blockchain & Gold Trading

A distributed settlement system to eliminate third-party verification and provide real-time transactions to participants.

Blockchain-based Monitoring log

Developed a monitoring log solution that captures attestations from participants for external auditors to assess consistency.

Cognitive platform

Audit Tie Out system that automates one of the most arduous tasks of public accounting tying out financial statements.

Competitor Intelligence Platform for Insurance Company

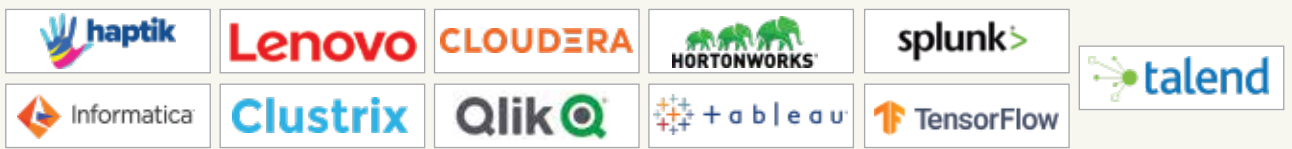

An intelligent platform to provide insights by comparing the financial parameters across the competitors thereby enabling to evaluate the performance.
